COMPLAINT

Plaintiff MICROSOFT CORP. (“Microsoft”) hereby complains and alleges that JOHN DOES 1-2 (collectively “Defendants”), have established an Internet-based cyber-theft operation referred to as “Thallium.” Through Thallium, Defendants are engaged in breaking into the Microsoft accounts and computer networks of Microsoft’s customers and stealing highly sensitive information. To manage and direct Thallium, Defendants have established and operate a network of websites, domains, and computers on the Internet, which they use to target their victims, compromise their online accounts, infect their computing devices, compromise the security of their networks, and steal sensitive information from them. Internet domains used by Defendants to operate Thallium are set forth at **Appendix A** to this Complaint and are referred to as the “Command and Control Infrastructure.” Microsoft alleges as follows:

JURISDICTION AND VENUE

15. The Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. § 1331 because this action arises out of Defendants' violation of The Computer Fraud and Abuse Act (18 U.S.C. § 1030), Electronic Communications Privacy Act (18 U.S.C. § 2701), the Lanham Act (15 U.S.C. §§ 1114, 1125), and the Anticybersquatting Consumer Protection Act (15 U.S.C. § 1125(d)). The Court also has subject matter jurisdiction over Microsoft's claims for trespass to chattels, conversion, unjust enrichment, and intentional interference with contractual

relationships pursuant to 28 U.S.C. § 1367.

16. Venue is proper in this judicial district pursuant to 28 U.S.C. § 1391(b) because a substantial part of the events or omissions giving rise to Microsoft's claims has occurred in this judicial district, because a substantial part of the property that is the subject of Microsoft's claims is situated in this judicial district, and because a substantial part of the harm caused by Defendants has occurred in this judicial district. Defendants maintain Internet domains registered in Virginia, engage in other conduct availing themselves of the privilege of conducting business in Virginia, and utilize instrumentalities located in Virginia and the Eastern District of Virginia to carry out acts alleged herein.

17. Defendants have affirmatively directed actions at Virginia and the Eastern District of Virginia by directing their activities, including theft of information, at individual users located in the Eastern District of Virginia and directing malicious computer code at the computers of individual users located in Virginia and the Eastern District of Virginia and attempting to and in fact infecting those user computers with the malicious computer code and instructions to Microsoft's Windows operating system, the computing devices and high-value computer networks of individual users and entities located in Virginia and the Eastern District of Virginia, in order to compromise the security of those systems and to steal sensitive information from those networks, all to the grievous harm and injury of Microsoft, its customers and licensees, and the public.

18. Defendants maintain certain of the Thallium Command and Control Infrastructure registered through VeriSign, Public Interest Registry and Neustar which reside in the Eastern District of Virginia. Defendants use these domains to communicate with and control the Thallium-infected computers that Defendants communicate with, control, steal from, update, and maintain in this judicial district. Defendants have undertaken the acts alleged herein with

knowledge that such acts would cause harm through domains located in the Eastern District of Virginia, through the Thallium domains maintained through facilities in the Eastern District of Virginia, and through user computers located in the Eastern District of Virginia, thereby injuring Microsoft, its customers and member organizations, and others in the Eastern District of Virginia and elsewhere in the United States. Therefore, this Court has personal jurisdiction over Defendants.

19. Pursuant to 28 U.S.C. § 1391(b), venue is proper in this judicial district. A substantial part of the events or omissions giving rise to Microsoft's claims, together with a substantial part of the property that is the subject of Microsoft's claims, are situated in this judicial district. Venue is proper in this judicial district under 28 U.S.C. § 1391(c) because Defendants are subject to personal jurisdiction in this judicial district.

Thallium

21. Thallium specializes in targeting, penetration, and stealing sensitive information from high-value computer networks connected to the Internet. The precise identities and locations of those behind the activity are generally unknown but have been linked by many in the security community to North Korean hacking group or groups. Thallium targets Microsoft customers in both the private and public sectors, including businesses in a variety of different industries. Thallium has targeted government employees, organizations and individuals that work on Nuclear Proliferation issues, think tanks, university staff members, members of organizations that attempt to maintain world peace, human rights organizations, as well as many other organizations and individuals. Thallium has been active since 2010, and it poses a threat today and into the future.

22. Thallium operates in the following fashion: after researching a victim organization, Thallium will identify individuals employed by that organization through publicly available information and by social-media interaction. Microsoft has observed fake email addresses being created to connect with possible victims and other potential targets. Thallium typically attempts to compromise the accounts of targeted individuals through a technique known as “spearphishing.” In a typical spearphishing attack, Thallium sends the targeted individual an email specifically crafted to appear as if it was sent from a reputable email provider (ex. Hotmail, Gmail, Yahoo). The threat actors frequently send emails that state that there is a problem with the victim’s account and/or suspicious login activity was detected. By gathering information about the targeted individuals from social media, public personnel directories from organizations

the individual is involved with, and other public sources, Thallium is able to package the spearphishing email in a way that gives the email credibility to the target. In many other cases, Thallium has created emails that appear to have been sent from a familiar contact known by the targeted user.

23. Thallium sends these emails from a variety of online email services which also include Hotmail, Gmail and Yahoo. The spearphishing emails often include links to websites that Thallium has set up in advance and that it controls. When a victim clicks on the link in the email, their computer connects to the Thallium-controlled website. The victim is then presented with a copy of a login page for the webmail provider that the victim is a subscriber of (e.g. Hotmail, Yahoo, Gmail, United Nations webmail¹).

24. **Figure 1** below shows a copy of a spearphishing email used by Thallium. The email was sent on January 3, 2019 and is spoofed to appear as if it was sent from a Microsoft Account Team. For example, in the email address from which the email was sent, the Thallium defendants have combined the letters “r” and “n” to appear as the first letter “m” in “microsoft.com.” Side by side, the letters “r” and “n” (*i.e.* “rn”) appear very similar to the letter “m.”

¹ Thallium is targeting individuals with email addresses associated with the United Nations and their @un.org domains.

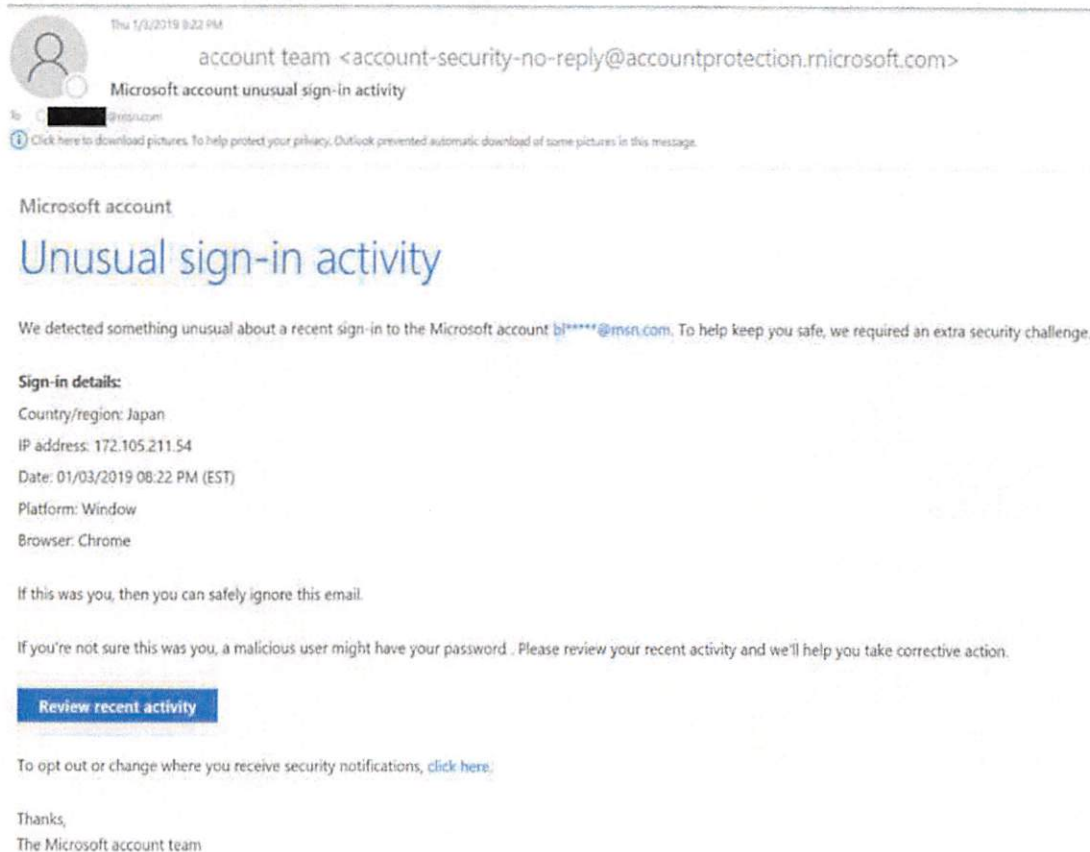

Figure 1 – Sample Spearphishing Email

25. By clicking on the links seen in the above examples, the targeted user will be connected to a Thallium-controlled website which will attempt to induce the victim to enter their account credentials. For example, in **Figure 1** above, the targeted user would have been taken to the following domain that is a masquerade of Hotmail.com: *login.hotrnall.com*

26. Upon successful compromise of a victim account, Thallium frequently logs into the account from one of their IP addresses to review emails, contact lists, calendar appointments, and anything else of interest that can be found in the account. On multiple occasions, Thallium has also created a new mailbox rule in the victim's account settings. This mailbox rule will forward all new emails received by the victim to Thallium-controlled email addresses which are included in the auto-forward rule. In this way, Thallium immediately receives copies of emails

received by the victim, and Thallium can store and review that stolen material on Thallium-controlled computers, beyond the control of the victim.

27. Thallium often keeps track of which links have been sent to which victims by including a Base64 hash² of the victim email address in the URL path of the link in the spearphishing email. This allows Thallium to verify quickly which victims have received and opened the spearphishing email and clicked on the link within. **Figure 2** below shows an example of a link with the victim email address Base64 hash included in the URL path.³

² A “hash” is a mathematical function that can be used to map data of arbitrary size to fixed-length values. “Base64” is an encoding scheme by which, for example, text such as an email address can be represented through corresponding Base64 alphanumeric character values.

³ In Figure 2, the first and last characters of the Base64 hash are shown for illustrative purposes, but the complete Base64 hash is obfuscated to preserve the privacy of the victim and plaintiff’s operational security, as the Base64 encoding could be readily reversed to show the victim email address. Similarly, the victim email address itself is obfuscated to protect their privacy.

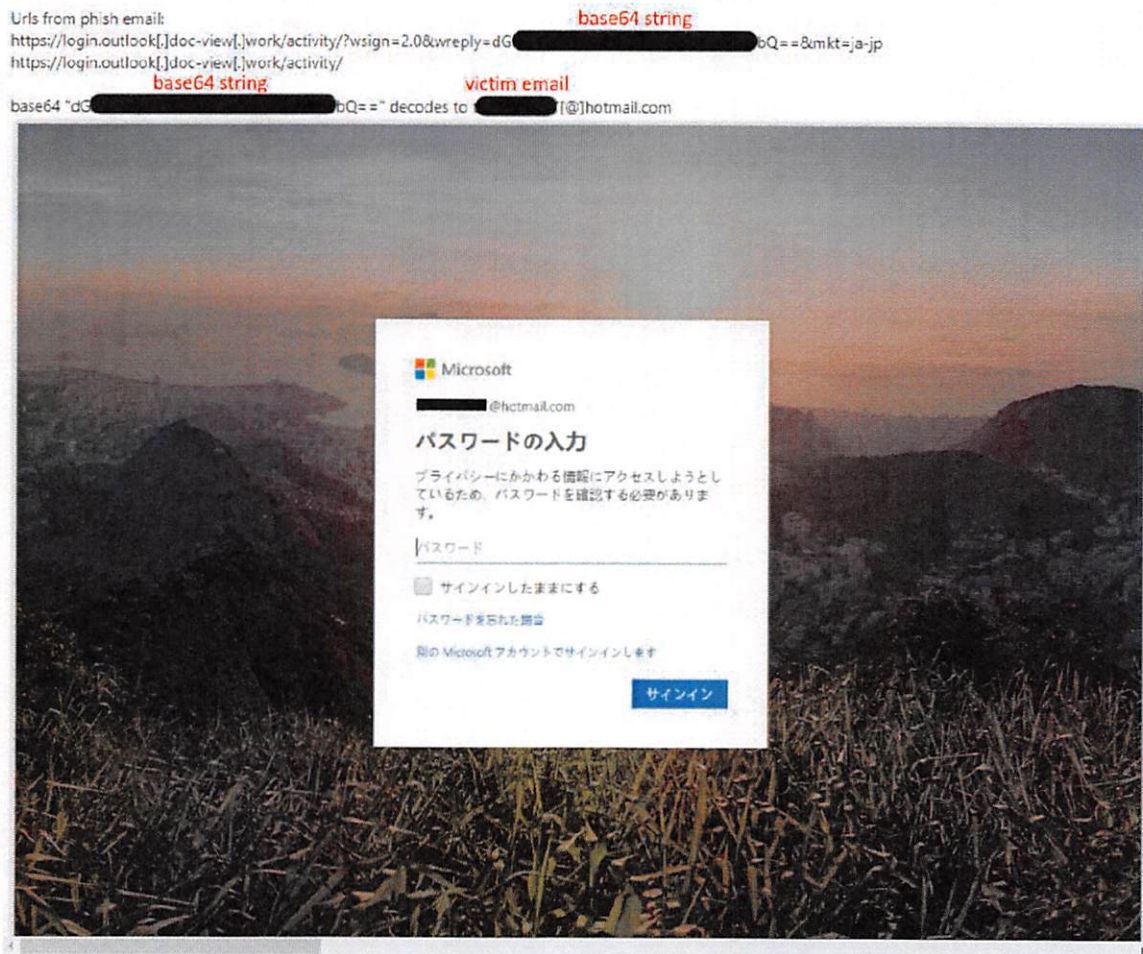

Figure 2 – Sample Spearphishing Login Page And URL Path

28. Thallium uses a variety of domain and subdomain themes to deceive victims into clicking or otherwise interacting with the domains. Some domains and subdomains have a webmail provider theme, such as “office356-us[.]org,” “outlook.mail[.]info,” “maingoogle[.]com,” or “inbox-yahoo[.]com,” while others mimic the victim’s organizations, such as “unite.un.graphwin[.]com,” “unite.office356-us[.]org,” or “naver.com-change[.]pw.” The bulk of Thallium’s domains however are generic but follow a pattern like “word-word[.]TLD,” such as “dialy-post[.]com,” “day-post[.]com,” or “app-wallet[.]com.” Some such domains used by Thallium are associated with servers used to control the operation of malicious software (“malware”) surreptitiously installed by Thallium on victim computers. For example,

such domains may send commands to the malware or receive technical responses or stolen data from the malware. The domains also have the benefit of being inconspicuous so as not to attract attention from network administrators when they are reviewing network traffic logs. All of these types of domains may be referred to as “command and control domains” and the associated computer infrastructure may be referred to as “command and control infrastructure.”

29. In addition, Thallium has developed a technique where a victim clicking on a malicious link in an email is first connected to the command and control infrastructure and is then re-directed to [http://go.microsoft\[.\]com/](http://go.microsoft[.]com/), a legitimate Microsoft domain. This technique deceives and confuses victims into thinking the link is not compromised because the domain is Microsoft’s and incorporates Microsoft’s trademarks and branded material. Even though the victim is ultimately redirected to a Microsoft domain, Thallium first registers the victim’s access to the command and control infrastructure to further carry out the malicious activity described in this declaration. For example, **Figure 3** below reflects that the malicious Thallium domain “seoulhobi[.]biz,” deceptively redirects the victim to a real Microsoft website containing Microsoft’s trademarks, in order to make a deceptive use of a legitimate Microsoft webpage, including the “Microsoft,” “Office,” “Windows,” “Surface,” “Xbox,” “HoloLens,” and “Azure” trademarks. The Thallium defendants carry out this technique in order to obfuscate their malicious activities. For example, researchers or other parties who are looking for malicious activities or accidentally browse to this domain may not understand that there is any malicious activity associated with it because it displays legitimate Microsoft content, which is actually displayed on a legitimate Microsoft website. Similarly, when the domain is being used for malicious purposes to target victims, the victim will be completely unaware of this fact because they are deceptively redirected to a legitimate Microsoft website that causes them to believe that the site is trustworthy, when in fact it is malicious and actively delivering malware.

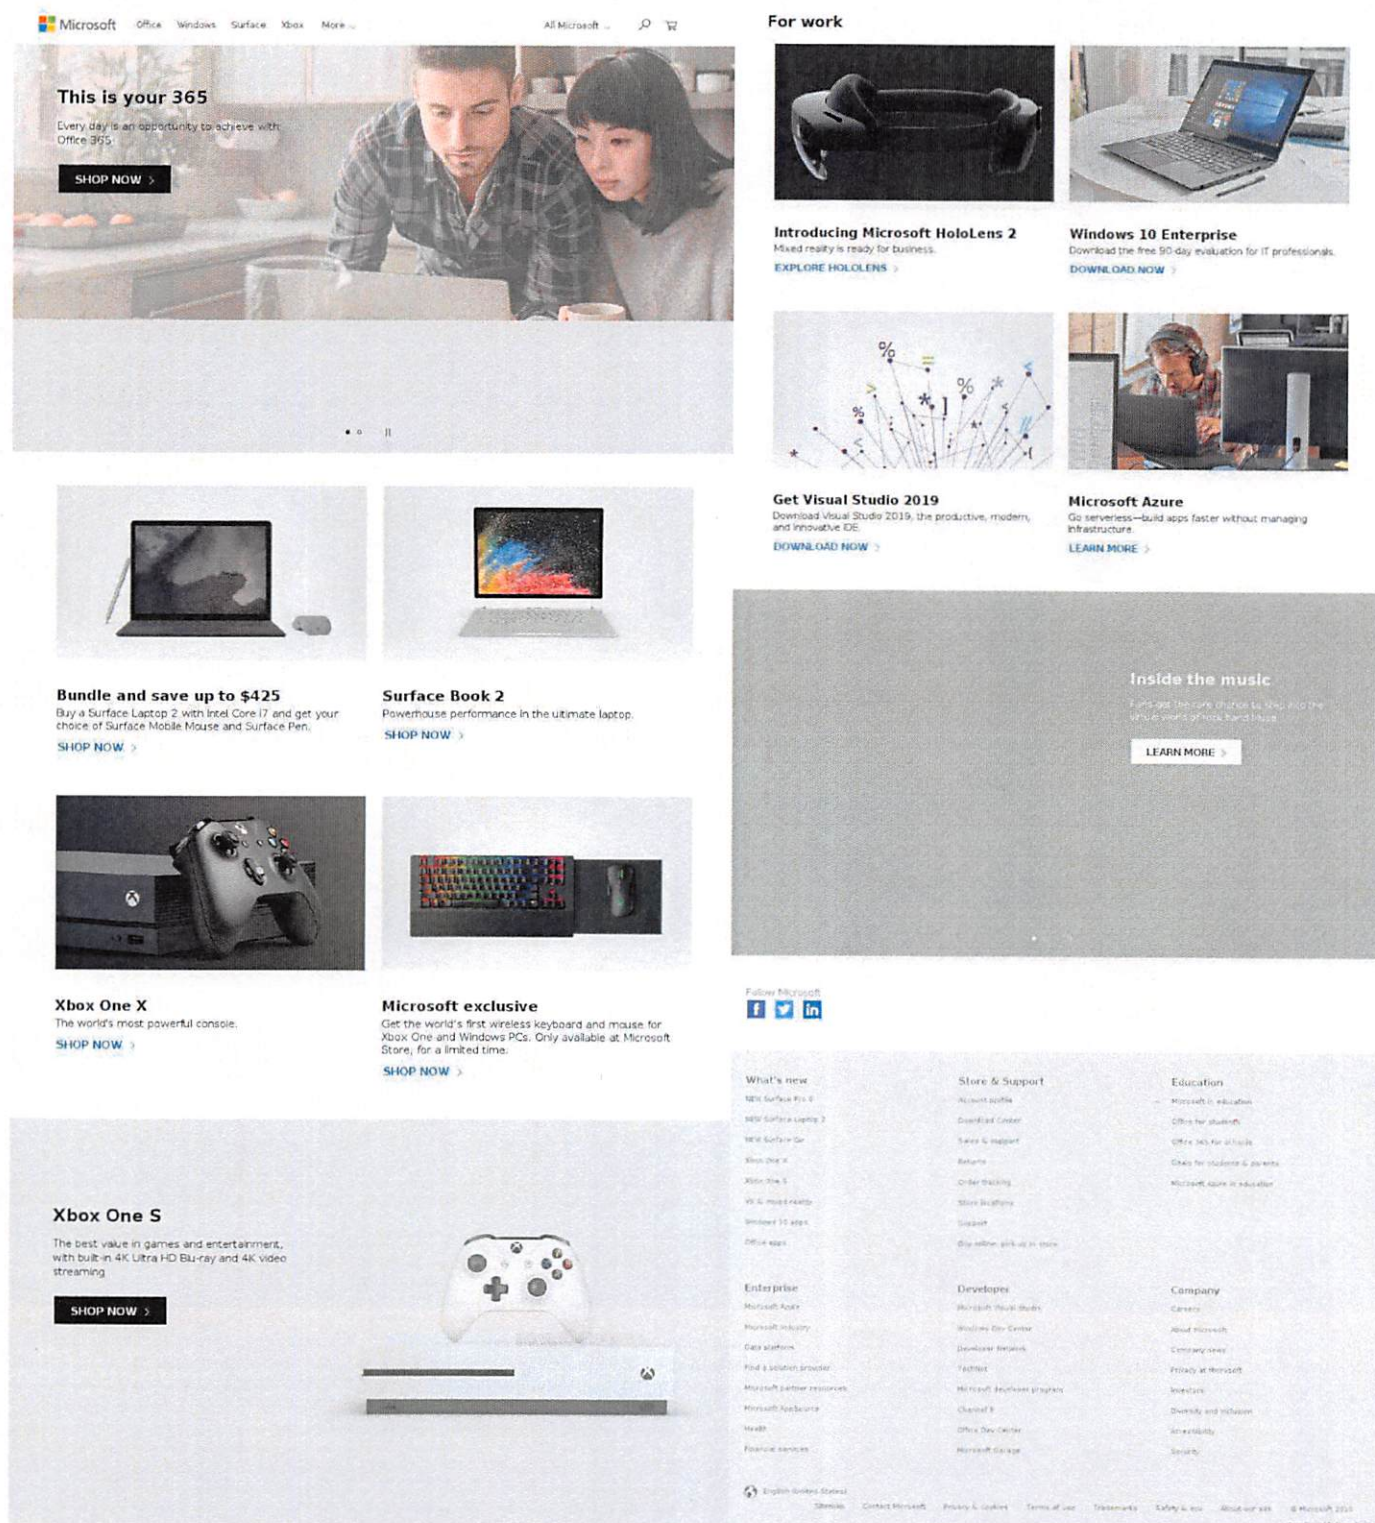

Figure 3 – Fraudulent Use Of Microsoft Website And Trademarks

30. Through research and investigation, Microsoft has determined that Thallium

currently uses the domains identified in **Appendix A** to this Complaint in its command and control infrastructure. The Thallium defendants sometimes disguise their command and control infrastructure by incorporating into the names of its command and control domains the names and trademarks of some well-known companies and organizations, including Microsoft, Google, Yahoo, and Naver (a South Korean online platform). As seen in **Appendix A** to this Complaint, Thallium has registered domains that contain Microsoft's brands and trademarks as disguises. Thallium's use of Microsoft brands and trademarks is meant to confuse Microsoft's customers into clicking on malicious links that they believe are associated and owned by Microsoft. As noted above, by tricking victims into clicking on the fraudulent links and providing their credentials, the Thallium defendants are then able to log into the victim's account. Additionally, the Thallium defendants can read sensitive and personal emails within the account, create new inbox rules including auto-forwarding, access the victim's contact list, send additional spearphishing emails to the victim's contacts, and hide traces of this malicious activity in the victim account by deleting emails. Customers expect Microsoft to provide safe and trustworthy products and services. There is a great risk that Microsoft's customers, both individuals and the enterprises they work for, may incorrectly attribute these problems to Microsoft's products and services, thereby diluting and tarnishing the value of these trademarks and brands.

31. In addition to targeting user's credentials, the Thallium defendants also utilize malware – the most common being indigenous implants named “BabyShark” and “KimJongRAT” – to compromise systems and steal data from victim systems. The Thallium defendants use misleading domains and Microsoft's trademarks to cause victims to click on the links that result in installation of this malware on the victims' computers. Once installed on a victim's computer, this malware exfiltrates information from the victim computer, maintains a persistent presence on the victim computer, and waits for further instructions from the Thallium

defendants.

32. Samples of the KimJongRAT malware were observed dating back to 2010. The BabyShark malware is frequently sent to users as a malicious attachment to an email. The malware will drop a file with the file extension “.hta.” That file will then send a command that will beacon out to obtain an encoded script that is delivered back to the victim computer. The malware enables all future macros for Microsoft Word and Excel by adding the following registry keys taking away the user’s ability to disable macros:

| |
|--|
| HKCU\Software\Microsoft\Office\14.0\Excel\Security\VBAWarnings,value:1 |
| HKCU\Software\Microsoft\Office\15.0\Excel\Security\VBAWarnings,value:1 |
| HKCU\Software\Microsoft\Office\16.0\Excel\Security\VBAWarnings,value:1 |
| HKCU\Software\Microsoft\Office\14.0\WORD\Security\VBAWarnings,value:1 |
| HKCU\Software\Microsoft\Office\15.0\WORD\Security\VBAWarnings,value:1 |
| HKCU\Software\Microsoft\Office\16.0\WORD\Security\VBAWarnings,value:1 |

33. From there, details and information from the victim computer are saved to victim’s computer in the Windows operating system file: %appdata%\Microsoft\ttmp.log. These details from the victim computer in the ttmp.log are then, ultimately, sent to one of the command and control servers of the Thallium defendants. From there, the Thallium defendants can send additional instructions and commands to the victim’s computer, and can exfiltrate additional stolen information from that computer. By specifically targeting Microsoft’s Windows operating system and utilizing registry and file paths containing Microsoft’s trademarks, in order to deceive users and carry out the fraudulent scheme, the Thallium defendants infringe Microsoft’s trademarks and deceptively use those trademarks in the context of Microsoft’s Windows operating system.

34. **Figure 4** reflects the relationship between the Thallium command and control

servers, associated with particular command and control domains, which interact with and receive information from computers infected with the BabyShark and KimJongRAT malware:
